Company profile

PRS International

We believe that it is our job to deliver innovation and find better, quicker and more cost-effective solutions for our customers.

We build relationships with our customers and not contracts.

We believe that we can only add real value to each other's business if we truly understand each other.

MISSION STATEMENT
To be the most reliable and ethical service provider of choice within the oil and gas, energy and refinery industry. Our pledge is to establish lasting relationships with our clients by exceeding their expectations and gaining their trust through exceptional deliverables whilst maintaining the highest levels of professionalism, integrity, honesty and fairness in our relationships with suppliers, subcontractor and professional associates.

Main Services

Our Services

We are a project organization who owns the strategic equipment that is necessary to deliver the best possible job.

We see every project as a challenge to make sure we deliver the best possible project result for our customer.

We want to excel in services 24/7 and always strive to deliver on time and keep our customer worry free.

Pipeline services

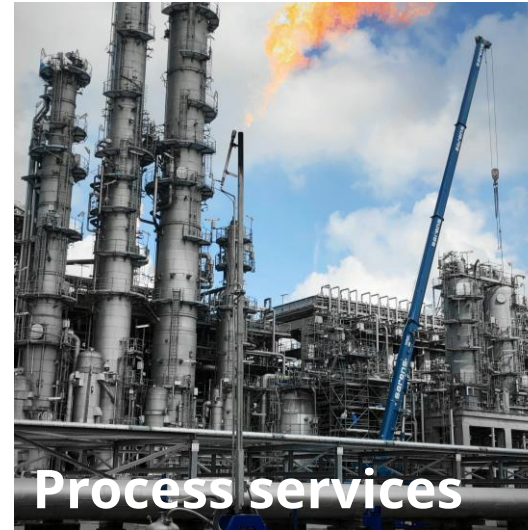

Nitrogen services

Commissioning services

Pigging services

Process services

Turnaround services

Pipeline Services

PRS International offers a wide range of pipeline services onshore and offshore, including:

- › Pipeline Inspections Services
- › Pipeline Pigging, Testing & Drying
- › Pipeline Displacement
- › Pipeline Cleaning Services
- › Pipeline Freezing

Nitrogen Services

PRS International can provide Nitrogen Services in both onshore and offshore situations:

- › Tightness & Strength Testing
- › Helium Leak Testing
- › Nitrogen Purging & Drying
- › Liquid / Gas N² Reactor Cool-Down
- › Heat-up
- › Hot-stripping

Process Services

PRS International can offer support during planned maintenance stops and unplanned shutdowns.

Besides, we provide other services, as:

- › Ethylene Filtering
- › Chemical Cleaning
- › Product Flare Services
- › Propylene Filtering
- › Product Filtering
- › Camera Inspections

Commissioning Services

PRS International has a wealth of experience and technical knowledge that enables it to provide excellent services for your commissioning projects:

- › Final Drying (<-65°C with N2)
- › Gas-up & Consultancy
- › Plant (Pre) Commissioning
- › Plant Cooldown Simulation
- › Engineering Services
- › Drying Oil-free Air

Turnaround Services

PRS International can offer support during turnaround and shutdown services, including:

- › Nitrogen purging
- › Product Hot-stripping
- › Nitrogen reactor cooldown/ heat-up
- › Mechanical support
- › Testing services
- › Engineering services

Pigging Services

PRS International provides pigging services to oil, gas and liquid installations. We are capable to provide launchers and receivers of any size and pressure rating.

- › Inline inspection
- › Mechanical services
- › Pigging assistance by water, product or N2
- › Launching and receiving equipment up to 36"
- › On-line product filtering

 - > Offshore

Method of Work

Fase one

Request for quotation

- › Engineering checks the requirements and the solutions we can provide to the customers
- › Sales checks if the request for quotation fits our scope
- › Operations makes sure that the right equipment is available at the planned moment

Fase two

Quotation

- › Engineering suggests the best work method for the customer
- › Sales provides the best possible offer for the customer
- › QHSE makes sure all quality, health, safety and environmental specs are in order

Fase three

Project assigned

- › Operations starts preparing the project
- › Sales provides the best possible offer for the customer

Fase four

Project execution

- › Operations executes the agreed upon scope of work
- › Continues corresponding with our customer

Fase five

Project rounded

- › Operations evaluates the project
- › Finance sends the pro-forma based on the executed and agreed upon work, when agreed they send the invoice
- › Sales evaluates the project with the customer

Research and Development

We believe that investing in our personnel, equipment, certifications and systems makes that we can provide the best services to our customers.

- › ATEX equipment group II; Equipment in this category is intended for use in areas in which explosive atmospheres caused by gases, vapours, mists or air/dust mixtures are likely to occur occasionally
- › The newest equipment with the highest standards not only technically the best but also regarding environment, low diesel usage etc.
- › We invest in knowledge management so we can make sure we always keep the right data available
- › Nonox filter; VolkerWessels has developed a technology which allows nitrogen emissions produced by both stationary and mobile equipment of projects to be reduced by as much as 99%. We call this technology the Nonox filter.
- › Innovation managers; we have a strong network of innovation managers within the VolkerWessels group who share their knowledge and findings

Human Resources and Development

Our personnel is one of our most important asset. Our values are embedded in each and every one of our team members and embodies our overall corporate culture, which is the core of PRS International.

- A good balance between junior and senior
- Continues learning and development possibilities

Quality, Health, Safety and Environment

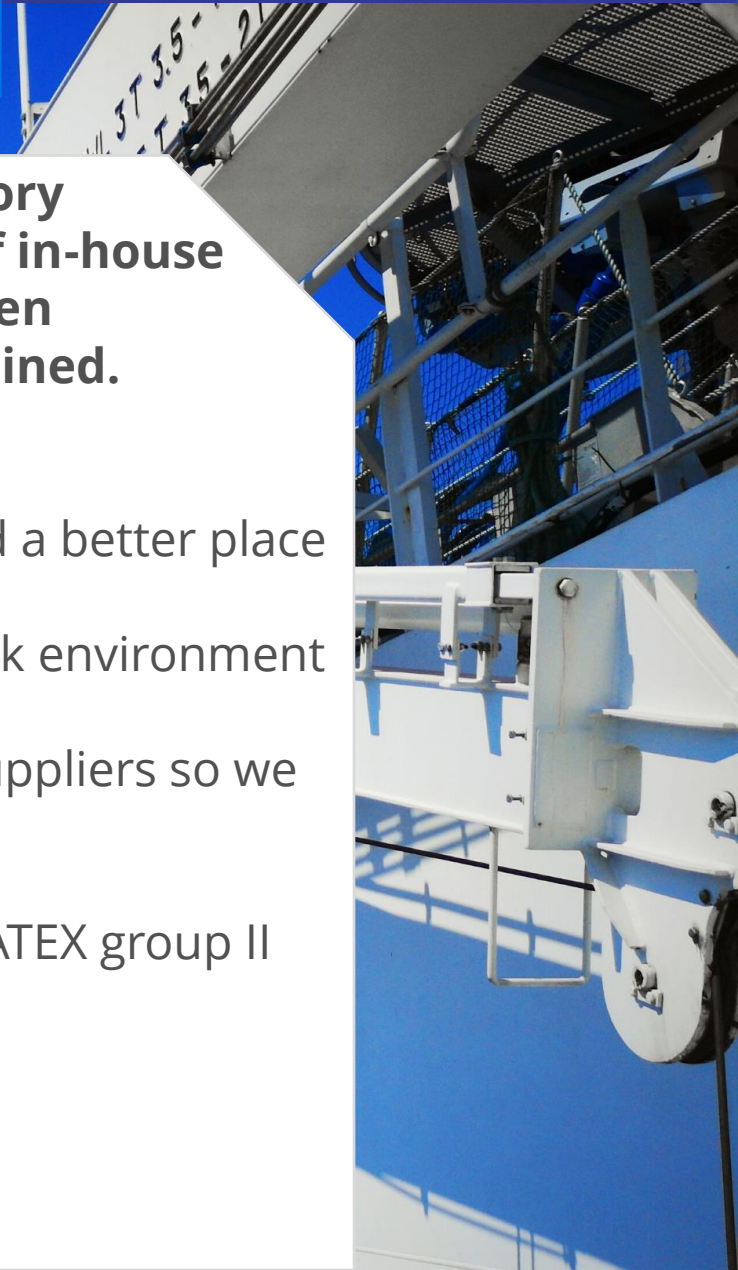

PRS International does not regard a focus on health and safety as a regulatory burden. This commitment is further strengthened by our dedicated team of in-house skilled safety experts. We ensure that all the hazards and risks that have been identified and assessed are controlled, monitored, documented and maintained.

We keep developing ourselves, we also focus on the following:

- > CSR; We think it is our duty to contribute as much as we can to make the world a better place
- > AVG; Protecting the data and privacy of our personnel is our standard.
- > Safe Double block bleed solution; We find the best solutions for the safest work environment
- > ISO 14001; This is one of our goals in 2021 to officially get accreditation
- > Strategic partners; We have various service level agreements with preferred suppliers so we can always deliver on time

We check every investment we make if it's environmentally justified and has the ATEX group II certification. We strive for an organic growth in equipment and personnel

- > Equipment investments we are planning to make:
 - > OPPS (Over Pressure Protection Skid)
 - > LTC (Low Temperature Cut-Out)

Certifications

We are proud to be accredited with our certificates and see this as the minimum requirement, with the intention of exceeding all Quality Control Standards.

- › NEN-EN ISO 9001:2015
- › SCC** 2008-5.1
- › FPAL Registered Company
- › CO2 Reduction: We are proud holder of the highest level of CO2 Reduction Ladder. Specific measures are taken to reduce our CO2 footprint.
- › Vital Certificate: Vitality program for our employees

Organizational Structure

- › Construction & Real Estate Development
- › Infrastructure
- › Energy & Telecoms Infrastructure

Facts and Figures

- › 4 countries
- › 120 Subsidiaries
- › 17,000 employees

Core values

- › Safety
- › Sustainability
- › Integrity
- › Sharing innovation and knowledge
